## ON COUNTER

**N**ot sure how to wear 24-carat colour? Brea

**Mulder, make-up artist for Shu Uemura, has some foolproof tips:**

- Skin should be kept fresh and minimal when wearing metallics, with an undetectable, featherlight foundation finish.
- For quick, high-impact eyes, apply a rose-gold/bronze tone all over lids, then curl lashes and end with two coats of mascara. Try Shu Uemura Pressed Eyeshadow in G Gold, \$28 (refill).
- Lightly dust rose-gold powder over your mouth's cupid's bow and at the centre of the lower lip.
- When using metallics, focus on one area of the face to avoid looking like a reject from *Xanadu*.

**WHAT'S BEST FOR ...**  
**Darker skin tones** Vibrant yellow-gold goes perfectly with this type of skin as it can carry the intensity of the colour better.

**Yellow-based complexions** Rose-gold tones work really well. A light dusting of this colour over cheeks can instantly lift skin to create a healthy glow.

**Fair skin** Platinum is ideal for light complexions. It provides subtle highlights and gives skin a freshness boost. It also works as an illuminator when used on the inner corner of the eye.

## GOLD MINE

Bling up without having to file for bankruptcy.
