## ON COUNTER

Protect (and freshen) your skin with these SPF foundations.

**Hissyfit Saving Face Moisturising Tinted Sunscreen SPF30+ in Nude, \$39.95**

"This was great for me as I'm always out in the sun. It gave nourishment, a natural tint, and a high SPF, however, I found it quite thick, which made it hard to apply (it resembled zinc rather than sunscreen)." **Megan**

**SAX Perfect Veil Foundation SPF15 in Medium, \$19.95**

"This was sheer and had a slightly dewy effect, which looked natural and lasted all day. For additional coverage, you can apply more since it didn't 'cake' on me. If anything, it felt more similar to moisturiser." **Ruby**

**Nutrimetics nc Sheer Tint Make-up SPF15 in Medium, \$33**

"I don't wear much foundation because I don't like the heavy feeling on my skin. This tint was just mace for me as it was light and added a fresh glow. Plus it had the bonus SPF - perfect for my life in Bali!" **Genevieve**
