**REGION:** National

**Makin' FACES!**

Follow our step-by-step guide for perfect make-up at any age

**40+**

(All the way along bottom lashes will make eyes appear small and too round.)

- Next, dust a silvery salmon shade over the brow bone to highlight and open up the eye area.
- Draw a thin line of kohl along the top lash line to give the appearance of thicker lashes. Smudge the line lightly for a softer finish, then apply mascara to top lashes only.

**EYES**

- As you age it's best to avoid applying shadow over the eye sockets as they can appear deep-set. Instead, create an open eye effect by applying a warm brown tone to the outer corners of the lids to create a V-shape that sweeps beneath the bottom lash lines, then continues halfway along those lashes.

**CHEEKS**

Brush bronzer over the apples of the cheeks out toward the hairline. Blend well so there are no hard lines visible.

**LIPS**

Apply lipstick to add colour and depth to lips, blot with a tissue, then apply a small amount of gloss over the top to create a fresh finish.

**TIP:** To stop lipstick feathering, line lips with a lip liner.
